Flash Financials

AI-POWERED · CONSTRUCTION FINANCE

Meet Your AI CFO.

Construction financial reporting in a flash.

THE PROBLEM

Accountants are drowning in manual reporting

Everything lives in Excel

Accountants export raw data from ERP systems and manually create or update reports.

Top talent stuck on low-value work

CFOs and Controllers spend their most valuable hours formatting spreadsheets instead of advising the business.

Owners are steering blind

Many contractors only look at their real numbers once a year when sending them to their CPA, and only at a summary level.

ERPs don't speak business

Accounting systems store the data but produce reports in formats nobody actually uses to run the company.

THE SOLUTION

An AI CFO that knows your entire business

Flash Financials connects to your ERP & CRM, maps every data point, and puts an AI CFO in the room — one that knows your jobs, cash flow, contracts, and change orders in full detail.

Talk to it like a person. It will build any report you need, instantly.

Connect

ERP + CRM data pulled automatically. No exports, no copy-paste.

Analyze

AI maps your data and learns your business inside out.

Interact

Ask questions via text or video avatar. Get answers instantly.

HOW IT WORKS

From raw ERP data to instant answers

1

Connect

ERP & CRM sync automatically

2

Map

AI maps all data to financial context

3

Train

AI learns your reports & patterns

4

Ask

Text or video avatar conversation

5

Deliver

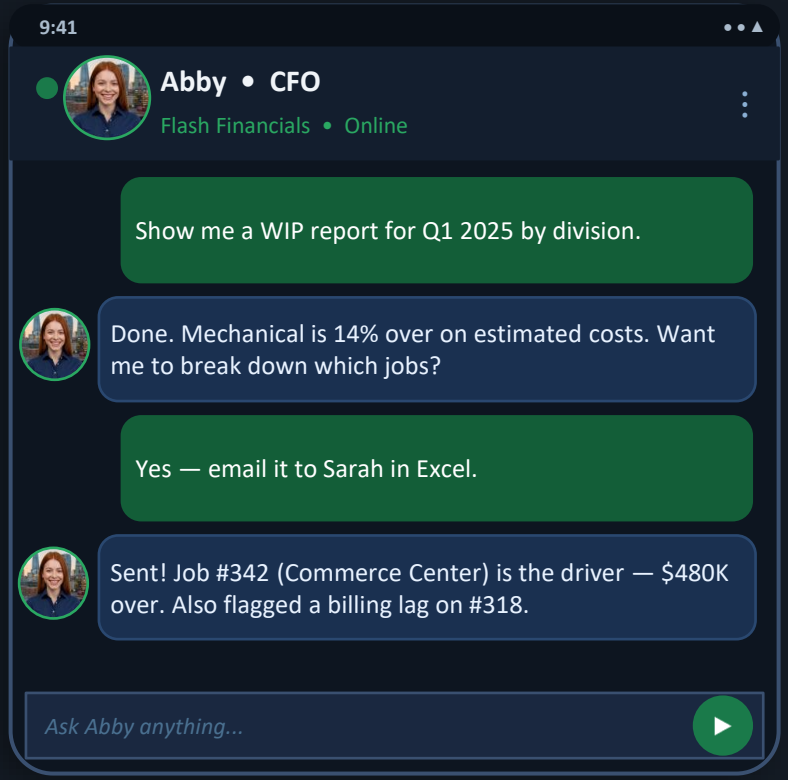
Reports to Excel, PPT, email, or dashboard

OUTPUT FORMATS:

- Excel Workbook
- PowerPoint Report
- Email Delivery
- Live Dashboard
- Chat / Q&A

PRODUCT

Talk to your AI CFO like a real human



Deep Context

Knows jobs, contracts, change orders, cash flow, billing schedules — all of it.

Text or Video Avatar

Chat or talk face-to-face with your AI CFO avatar.

Any Output Format

Reports in Excel, PowerPoint, email, or live dashboard.

Proactive Alerts

AI spots anomalies, profit fade, and billing gaps before you ask.

PRODUCT

A full library of construction-specific reports

Financial Reports

- Balance Sheet
- Income Statement
- Statement of Cash Flow
- Budgeting & Variance Analysis
- Commission & Sales Reporting

Job-Level Reports

- Work in Progress (WIP)
- Job Cash Flow Analysis

WIP Report

Real-time over/under billing by job, division, PM

Job Profit Fade

Spot margin erosion before it's too late

KPI Dashboard

Custom KPIs tailored to your operations

Cash Flow Forecast

Job-level cash flow projected forward

Divisional & Service

HVAC, Service, GC/TI — separate P&Ls by division

Custom Reports

Infinite custom reports built by your AI CFO

Why construction?

$2.1T

U.S. Construction Industry Revenue

Source: U.S. Census Bureau, 2024

730K+

Contracting Firms in the United States

Source: IBIS World, 2024

Why construction is the perfect first market

- Complex accounting — percentage-of-completion, WIP, prevailing wage, and multi-division P&Ls that generic tools can't handle
- Severe shortage of qualified construction CFO candidates — companies can't hire the expertise they need
- ERP systems store the data but produce reports that don't reflect how owners and CFOs actually think about the business
- Owners and executives lack simple, clear visibility into what's really happening — the business runs on gut feel, not real-time data
- Construction ranks last in tech adoption ahead of only agriculture — this is a wide-open, highly disruptive opportunity

Customize your CFO and your reports

Abby — AI CFO

Powered by Live Avatar · www.liveavatar.com

A CFO you can actually talk to

Natural Conversation

Ask questions in plain English — no menus, no forms. Just talk to your CFO like you would a real person.

Reports On Demand

Say 'show me job cost for Commerce Center' — your AI CFO pulls it up instantly, every time.

Automated Delivery

Schedule recurring reports. The AI CFO emails them, builds the deck, or posts to the dashboard.

Trained on Your Data

The avatar knows your jobs, contracts, billing history, and ERP data — full context, not generic answers.

Simple, scalable, and sticky

How We Charge

Setup Fee

One-time onboarding — known ERPs are fast. New ERP integrations mapped once, reused forever.

Core SaaS

Monthly per-company subscription: unlimited AI CFO interactions, reports, users, and dashboards.

Process Automation+

Add-on SaaS: automate AP, Payroll, Project Accounting, and Compliance workflows with AI agents.

Roadmap

Now

- Deliver reports to construction clients today
- Near turn-key onboarding for known ERPs (Spectrum, Sage, Viewpoint)
- Growing library — each new client expands the template set
- AI video avatar CFO (liveavatar.com)
- Self-service dashboard + user permissions
- Proactive anomaly detection and alerts

Soon

- Process Automation add-on: AP, Payroll, Project Accounting, Compliance
- AI agents that don't just report — they act
- Expand beyond construction

Ready to see an AI CFO in action?

- Watch a live demo with your own ERP data
- Talk to the AI CFO to get real-time answers without waiting
- AI report customization and completely automated
